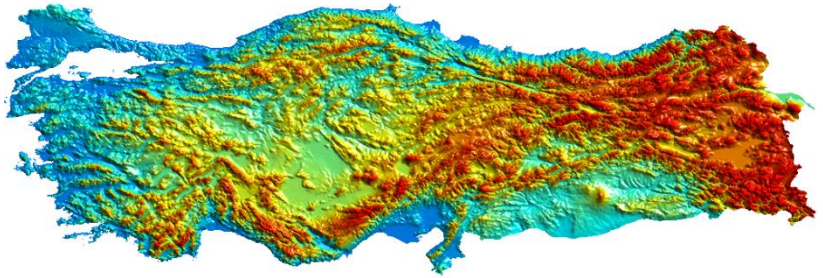
The Next BIG Thing!

MapInfo Pro Raster

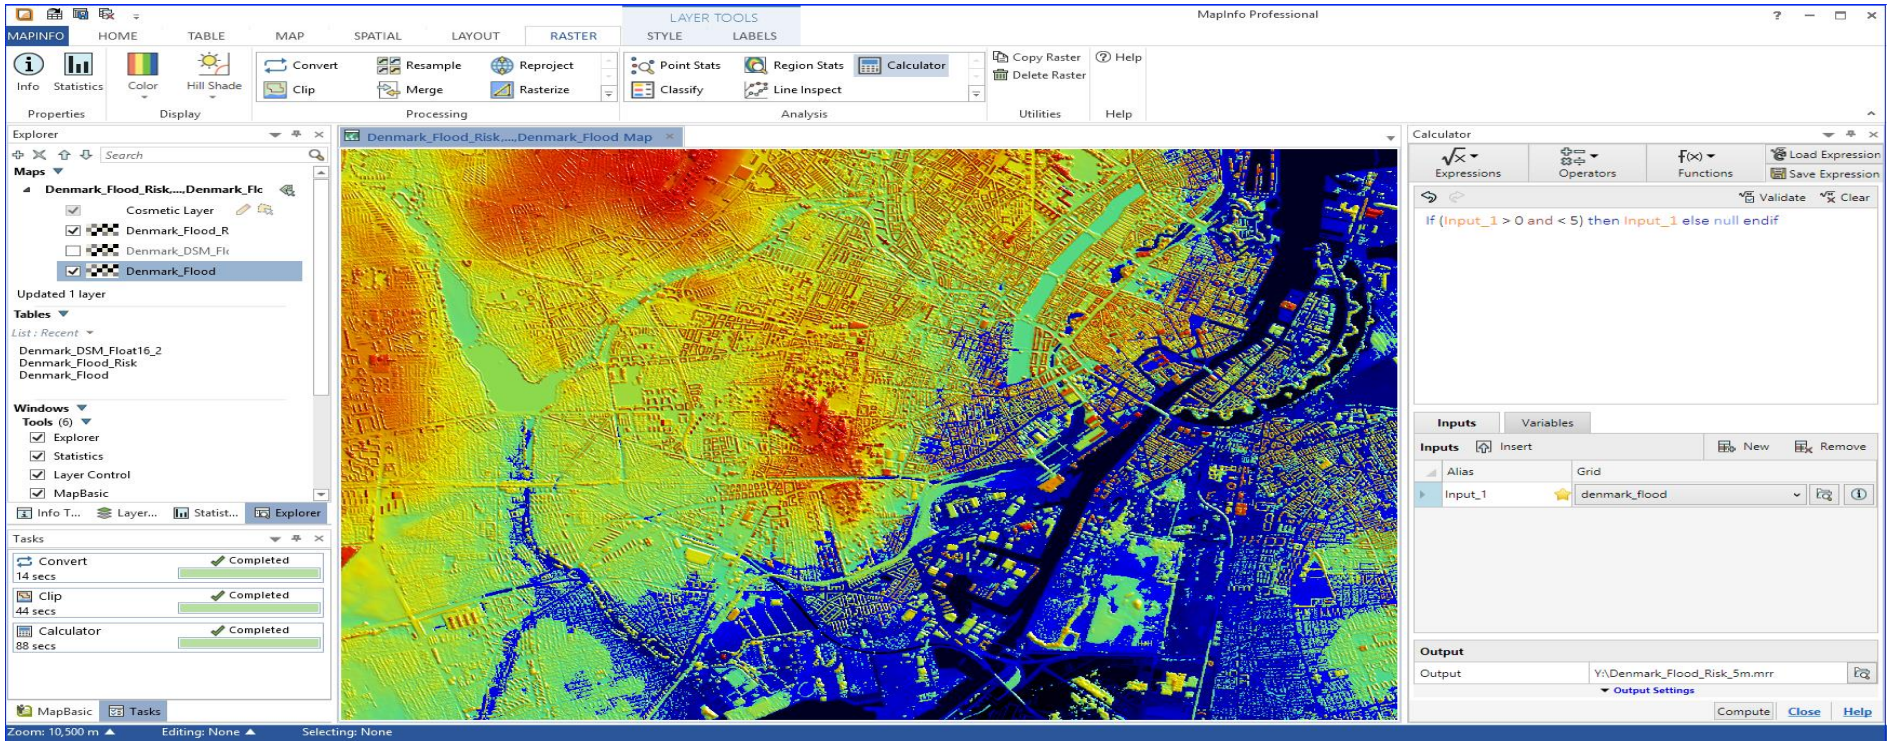
MapInfo Pro Raster

New raster/grid capability for MapInfo Pro



- Native 64-bit extension
- New multi-resolution file format
- High performance rendering and processing
- Functionality integrated directly into MapInfo Pro
- .NET API for application programmability
- Ribbon based user interface

New User Experience



New Capabilities

Raster functions available (v1.0)

Raster Properties

- Metadata, Statistics, Cell Info

Display

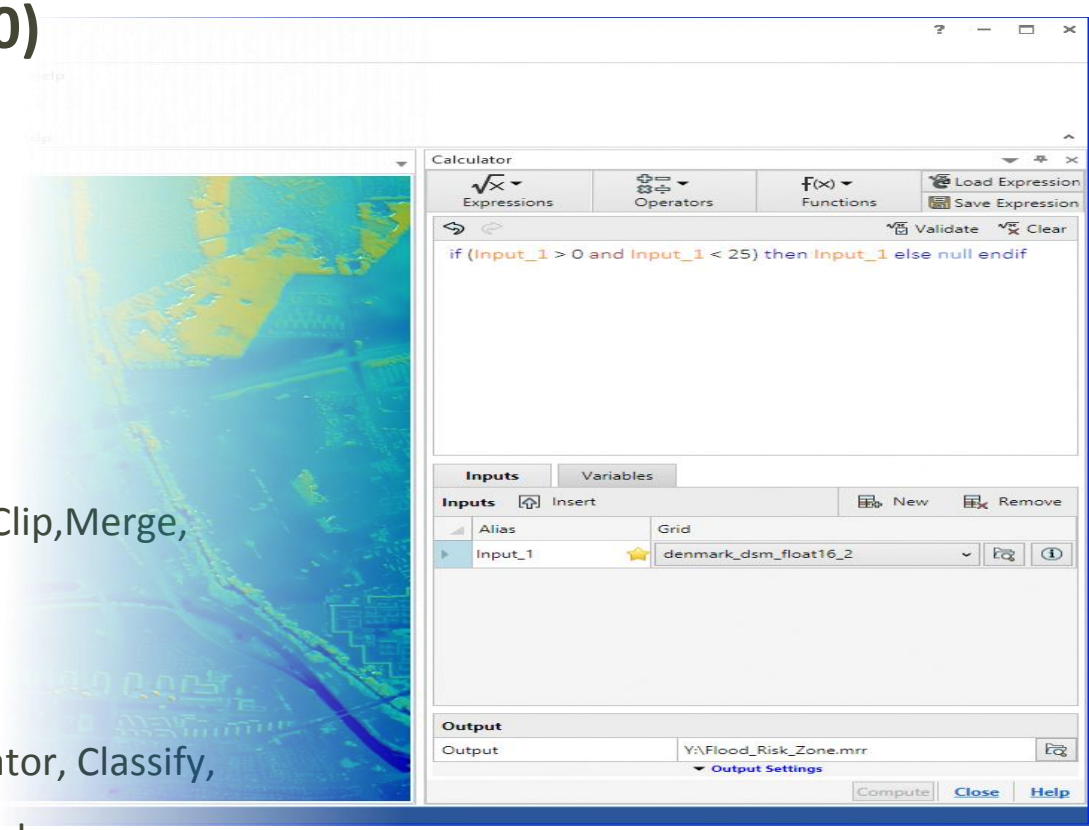
- Colour modulation, hill shading

Processing

- Convert, Reproject, Resample, Clip,Merge, Rasterize

Analysis

- Point/Line/Region Stats, Calculator, Classify, Filter, Contour, Profile, Viewshed



New Possibilities

Exciting future

- Successor to Vertical Mapper and Engage3D.
- Enhancement to vertical specific applications such as Discover and Crime Profiler.
- New raster API for customers and partners to build their own custom functions to support specific market needs.
- Capability expanded across the MapInfo suite including Spectrum Spatial on the server.
